

EXERCISE YOUR POWER OVER POWER.

M not only gives you exceptional power, you maintain control over that power through innovative technologies. Launch Control sets the ideal engine launching speed when pushing the accelerator pedal. Dynamic Damper Control analyzes real-time road data to match the shock absorbers to road and driving conditions. Dynamic Stability Control provides confidence when cornering in all conditions. M Servotronic optimizes steering input by dynamically adjusting steering assistance to suit current speed and delivers a direct and precise steering response even at high speeds.
